

Happy Valentine's Day!

from

Caterina

Valentine's Day is all about spreading love. It's one of Caterina's favorite holidays! She has lists and lists of ways to celebrate. She likes to make cards and cupcakes to give to friends and family. She hopes these free designs will inspire you to do the same!

Paper: Caterina recommends 8.5"x 11" bright white, heavy cardstock paper (110 lb.), or art paper for the cards and cupcake holders; and bright white 24lb. paper for envelopes.

Printing: At home: Any desktop printer should work fine, be sure to set for maximum quality and print at 100%. Office Supply Store: Be sure to have them print a test first so that colors can be adjusted to your preferences.

Scoring: To get crisp folds, score your paper. Use a straight edge tool (like a metal ruler) and an old pen whose ink has run out to create a crease on the printed fold lines before folding.

Options: For more decorative cards, finish edges with pinking sheers or scalloped edged craft scissors. Be creative with hole punches, ribbons, and collage.

Caution: Always supervise children when using scissors. Never let children use an X-acto knife!
